DEMOGRAPHIC OF SURVEY RESPONDENTS

In 2015, Community Foundation Grey Bruce conducted a survey and three public engagement meetings that asked residents of Grey Bruce and the First Nations Territories which issues were important to them. Approximately 504 people responded to the survey. The survey respondents and public discussions helped to determine the areas of vitality that were examined in the Vital Signs report.

Q54 Check the three areas of vitality that are most important to you.

Answered: 498; Skipped: 6

Employment & Economy: 253
Health & Wellness: 238
Education & Learning: 157
Environment: 145
Community Involvement, Belonging & Leadership: 133
Arts & Culture: 100
Income Distribution & Poverty: 96
Housing & Homelessness: 88
Recreation & Leisure: 82
Getting Around (Transportation): 70
Food Security: 54
Safety & Security: 54
Diversity: 34
Getting Started & Living Here: 31

Please note, total responses exceed total number of survey respondents as up to three areas of vitality could be chosen by each respondent.

Q54 Do you consider yourself to be part of an ethnic or cultural minority?

Answered: 492; Skipped: 12

Yes: 59 (12%)
No: 433 (88%)
Total Responses: 492

Q55 How long have you live here?

Answered: 495; Skipped: 9

Under 5 years: 61 (12%)
6 to 10 years: 66 (13%)
11 to 20 years: 91 (19%)
More than 20 years: 276 (56%)
Seasonal Dweller: 1(0%)
Total Responses: 495

Q56 What is your gender?

Answered: 495; Skipped: 9

Male: 139 (28%)
Female: 355 (72%)
Other: 1 (0%)
Total Responses: 495

Grey Bruce Community Foundation Vital Signs 2016 Full Indicators and Data Sources

Q57 What age group do you fit into?

Answered: 498; Skipped: 6

Under 14 years: 0 (0%)
15 to 19 years: 11 (2%)
20 to 24 years: 21 (4%)
25 to 34 years: 62 (12%)
35 to 44 years: 74 (15%)
45 to 64 years: 254 (51%)
65 to 84 years: 73 (15%)
Over 85 years: 3 (1%)
Total Responses: 498

Q59 How many people currently live in your household? Please include yourself.

Answered: 493; Skipped: 11

1 person: 68 (14%)
2 people: 221 (45%)
3 people: 88 (18%)
4 people: 75 (15%)
5 people: 26 (5%)
6 or more people: 15 (3%)
Total Responses: 493

IF GREY BRUCE WERE A VILLAGE OF 100

Current Smokers

"In your lifetime, have you smoked a total of 100 or more cigarettes (about 4 packs)? Yes, No" (Statistics Canada, 2015b, p. 150).

If yes:

"At the present time, do you smoke cigarettes daily, occasionally, or not at all?" (Statistics Canada, 2015b, p. 151).

Table 59. Percent who are current smokers by year, GBHU and Ontario

Year	GBHU	Ontario
2013/14	18.8 (15.3–22.4)	17.7 (17.1–18.3)

Leisure Time Physical Activity

This indicator is derived from a series of questions that ask about various physical activities that respondents may engage in. The resulting indicator measures three levels of physical activity: Active, Moderately active, and Inactive.

Moderately Active or Active

Table 68. Percent who are physically active by year, GBHU and Ontario

Year	GBHU	Ontario
2013/14	58.6 (53.0–64.2)	53.4 (52.5–54.4)

Source: Statistics Canada 2011 Census Profile Grey Bruce

If Grey Bruce were a village of 100:

- Total Population 15 years and over by Marital Status: 134,770
 - Married or Living with a Common-Law Partner: 85,355 (63%)
 - Divorced: 6,980 (5%)
 - Single (and never legally married): 29,090 (22%)
- Total Population by age groups: 158,670
 - Over the age of 65 years: 32,745 (21%)
- Detailed Mother Tongue - Total population excluding institutional residents: 156,220
 - Single Responses English – 143,820 (92%)

If Ontario were a village of 100:

- Total Population 15 years and over by Marital Status: 10,671,050
 - Married or Living with a Common-Law Partner: 6,158,610 (58%)
 - Divorced: 593,735 (6%)
 - Single (and never legally married): 2,985,020 (28%)
- Total Population by age groups: 12,851,820
 - Over the age of 65 years: 1,878,335 (15%)
- Detailed Mother Tongue - Total population excluding institutional residents: 12,722,060
 - Single Responses English – 8,677,045 (68%)

Source: Statistics Canada 2011 National Household Survey (NHS) Profile Grey Bruce

If Grey Bruce were a village of 100:

- Total Population in private households by immigrant status: 155,070
 - Immigrants: 11,660 (8%)
- Total labour force aged 15 years and over by class of worker: 82,080
 - Self-employed: 13,275 (16%)

Grey Bruce Community Foundation Vital Signs 2016 Full Indicators and Data Sources

If Ontario were a village of 100:

- Total Population in private households by immigrant status: 12,651,795
 - Immigrants: 3,611,365 (29%)
- Total labour force aged 15 years and over by class of worker: 6,864,985
 - Self-employed: 706,425 (10%)

HEALTH & WELLNESS

Self-rated Health

Self-rated health is a person's perception of his or her own health. Perceived health is an indicator of overall health status. It can reflect aspects of health not captured in other measures, such as incipient disease, disease severity, physiological and psychological reserves and social and mental function. Perceived health refers to a person's health in general—not only the absence of disease or injury, but also physical, mental and social well being.

It is presented in terms of the percentage of people who rated their health as very good or excellent.

Question "This survey deals with various aspects of your health. The following questions ask about physical activity, social relationships and health status. By health, we mean not only the absence of disease or injury but also physical, mental and social well-being. In general, would you say your health is: Excellent, Very good, Good, Fair, or Poor?"

Table 2. Percent in Very Good or Excellent Self-Rated Health by Region

Region	Rate
Canada	59.2 (58.8–59.7)
Ontario	59.5 (58.8–60.3)
GBHU	57.4 (52.3–62.4)

Self-rated Mental Health

Self-rated mental health is another indicator or predictor of real health status. It is a person's own perception of his or her own mental health status, and represents not only the absence of mental illness, but also the ability to enjoy life. Self-rated mental health is presented in terms of the percentage of people who rated their mental health as very good or excellent.

Question "In general, would you say your mental health is: Excellent, Very good, Good, Fair, or Poor?"

Table 8. Percent in Very Good or Excellent Self-Rated Mental Health by Region

Region	Rate
Canada	71.1 (70.6–71.6)
Ontario	70.7 (69.8–71.5)
GBHU	67.9 (64.1–71.7)

Increase in Obesity Rates since 2003

Body mass index (BMI) is derived from respondents' height and weight, as reported by them. It's weight in kg divided by the square of height in metres (BMI = kg/m²), rounded down to the nearest whole number for the purpose of categorizing by BMI class. A 2008 study published by Statistics Canada found that, on average, when comparing reported height and weight to measured height and weight, men underestimated their BMI by 0.9 kg/m², while women underestimated it by 1.2 kg/m² (Shields, M., Connor Gorber, S., & Tremblay, M. S., 2008). This has implications for reported obesity and overweight rates—real obesity and overweight rates are likely to be higher than the rates presented.

BMI categories are as follows:

- <20 Underweight
- 20 to 24 Normal weight
- 25 to <30 Overweight
- 30 and over Obese
 - (30 to <35 = Class I obese)
 - (35 to <40 = Class II obese)
 - (40 and over = Class III obese)

Grey Bruce Community Foundation Vital Signs 2016 Full Indicators and Data Sources

Table 43. Percent who are obese by year, GBHU and Ontario

Year	GBHU	Ontario
2003	22.7 (19.3–26.0)	15.2 (14.7–15.8)
2013/14	25.0 (20.1–29.8)	19.2 (18.5–19.9)

Reference: Shields, M., Connor Gorber, S., & Tremblay, M. S. (2008). *Estimates of obesity based on self-report versus direct measures. Component for Statistics Canada. Health Reports, Number 82-003-X.*

Current Smokers

"In your lifetime, have you smoked a total of 100 or more cigarettes (about 4 packs)? Yes, No" (Statistics Canada, 2015b, p. 150).

If yes:

"At the present time, do you smoke cigarettes daily, occasionally, or not at all?" (Statistics Canada, 2015b, p. 151).

Table 59. Percent who are current smokers by year, GBHU and Ontario

Year	GBHU	Ontario
2013/14	18.8 (15.3–22.4)	17.7 (17.1–18.3)

Life Satisfaction

Life satisfaction is a personal subjective assessment of global well-being. This indicator presents the responses to the question presented below ranging from 8 to 10.

Question "Using a scale of 0 to 10, where 0 means "Very dissatisfied" and 10 means "Very satisfied", how do you feel about your life as a whole right now?"

Table 14. Percent in Who Are Satisfied or Very Satisfied with Life in General by Region

Region	Rate
Canada	92.0 (91.7–92.3)
Ontario	90.9 (90.4–91.5)
GBHU	90.5 (87.6–93.4)

Regular Heavy Drinking

Shield et al. (2012) noted that by 2005, 7.7% of deaths of Canadians between the ages of 0 and 64 were alcohol-attributable, and "[t]he largest contributors to alcohol-attributable mortality were unintentional injuries, malignant neoplasms [cancer], and digestive diseases". Further, "[t]he most important specified causes of preventable deaths were liver cirrhosis ... and motor vehicle accidents" (ibid).

Although some diseases see a reduced risk with the consumption of small amounts of alcohol, alcohol consumption contributes to approximately 14 times the potential years of lives lost than it prevents (Shield et al., 2012), largely contributed to by heavy drinking (cirrhosis, motor vehicle accidents). Alcohol-attributable deaths are largely preventable through following safer drinking practices.

Canada's Low-risk Alcohol Drinking Guidelines suggests that the safest levels of alcohol consumption (besides abstinence) should fall within the following limits:

For men: 15 drinks a week, maximum, with no more than 3 drinks a day on most days On special occasions, no more than 4 drinks

For women: 10 drinks a week, maximum, with no more than 2 drinks a day on most days On special occasions, no more than 3 drinks

Source: (Canadian Centre on Substance Abuse, 2013)

The Regular Heavy Drinking indicator provides the estimate of the population who exceed the special occasion Low-Risk Drinking Guideline at least monthly.

Questions "During the past 12 months ... have you had a drink of beer, wine, liquor or any other alcoholic beverage? Yes, No"

Grey Bruce Community Foundation Vital Signs 2016 Full Indicators and Data Sources

If Yes: "How often in the past 12 months have you had [5 if male, 4 if female] or more drinks on one occasion? Never, Less than once a month, Once a month, 2 to 3 times a month, Once a week, More than once a week"

Table 66. Percent in Who Are Regular Heavy Drinkers by Year

Region	Rate
Canada	18.4 (18.0–18.8)
Ontario	16.7 (16.0–17.3)
GBHU	22.7 (17.3–28.0)

References: Shield, K. D., Taylor, B., Kehoe, T., Patra, J., & Rehm, J. (2012). Mortality and potential years of life lost attributable to alcohol consumption in Canada in 2005. *BMC Public Health*, 12(1), 1–12.

Leisure Time Physical Activity

This indicator is derived from a series of questions that ask about various physical activities that respondents may engage in. The resulting indicator measures three levels of physical activity: Active, Moderately active, and Inactive.

Table 68. Percent Who Are Physically Active by year, GBHU and Ontario

Year	GBHU	Ontario
2003	52.5 (48.3–56.6)	51.4 (50.7–52.1)
2013/14	58.6 (53.0–64.2)	53.4 (52.5–54.4)

Nutrition – Consuming Fruits or Vegetables 5 or more Times a Day^x

This indicator is a composite of six indicators that measure how many times a day the following are consumed: fruit juice, fruit, salad, potatoes, carrots, and other vegetables. It is based on the answers to a series of questions about consumption of specific fruit and vegetables and their juice.

Table 74. Percent Who Consume Fruit/Vegetables 5+ Times a Day by Year, GBHU and Ontario

Year	GBHU	Ontario
2003	47.0 (41.3–52.7)	41.9 (41.1–42.6)
2013/14	42.0 (36.8–47.2)	38.7 (37.9–39.6)

Unintentional Falls

Emergency Room Visits ERV data were extracted from the Ambulatory Visits tables, which contain data from the National Ambulatory Care Reporting System (NACRS), developed by the Canadian Institute for Health Information (CIHI). The data citation for these emergency room visit data is:

Grey Bruce Community Foundation Vital Signs 2016 Full Indicators and Data Sources

Reference: Ambulatory Visits 2003–2009, Ontario Ministry of Health and Long-term Care, IntelliHEALTH Ontario, Date Extracted: February 25, 2011.

“Fall on same level involving ice and snow; Fall on same level from slipping, tripping and stumbling; Fall involving skates, skis, sport boards and in-line skates; Other fall on same level due to collision with, or pushing by, another person; Fall while being carried or supported by other persons; Fall involving wheelchair and other types of walking devices; Fall involving bed; Fall involving chair; Fall involving other furniture; Fall involving playground equipment; Fall on and from stairs and steps; Fall on and from ladder; Fall on and from scaffolding; Fall from, out of or through building or structure; Fall from tree; Fall from cliff; Diving or jumping into water causing injury other than drowning or submersion; Fall from one level to another; Other fall on same level; and Unspecified fall”

Summary: Grey Bruce has a 72% higher age-standardized rate of unintentional falls ERVs (emergency room visits) (4922.4 ± 56.6 per 100,000 population, RR = 1.72) than Ontario. The four-year Grey Bruce age-standardized rate of unintentional falls ERVs has also risen by 5% over that of the last four-year period. Age-specific unintentional falls ERV rates are highest for the 0–14-year old and 65-year-old and over age groups (7434.7 ± 161.3 and 7061.8 ± 144.3 per 100,000 population, respectively).

ARTS & CULTURE

Source: Regional Tourism Organization 7 (Bruce, Grey, Simcoe)

Regional Tourism Organization 7 provides strategic and collaborative leadership to build, sustain and grow tourism in [BruceGreySimcoe \(see map\)](#). Support for Local Talent

Reference: Ontario Arts Council. (2011). *Ontario Arts Engagement Study: Results from a 2011 Province-wide Study of the Arts Engagement Patterns of Ontario Adults*.

The Ontario Arts Engagement Study is an assessment of patterns of engagement in arts activities amongst Ontario residents, commissioned by the Ontario Arts Council (Ontario, Canada). Data collection was completed by Ipsos Reid in May and June of 2011. A total of 1,594 telephone interviews were completed, including a general population sample of 1,300 and booster samples of certain sub-populations of interest, including visible minorities, Aboriginals and Francophones.

This study group responses by area or region including: 1) City of Toronto, 2) 905 region (Greater Toronto Area excluding the City of Toronto), 3) Central Ontario, 4) Eastern Ontario, 5) Northern Ontario, and 6) Southwest Ontario. Bruce and Grey Counties are part of the Southwest Ontario group. Data was not able to extracted for just Bruce and Grey Counties.

Frequency Index: A standardized measure of frequency, with a baseline at 100 (the grand mean for all activities). This allows for comparison of subgroups of respondents on individual arts activities. For example, the frequency index for “listen to music on a local radio station” is 495 vs. an average of 100 for all 45 activities. In other words, Ontarians reported frequency of doing this activity is nearly five times higher than the average frequency of all activities.

Southwest (n = 307)

- Music Activities Compared: Attend concerts by students or community musicians = 109 (index)
- Theatre Activities Compared: Attend plays or musicals with student or community actors = 109 (index)

EDUCATION & LIFELONG LEARNING

Source: Grey Bruce Health Unit, Community Picture (2014)

Vulnerability in School Readiness

School readiness is a good indicator of early childhood growth and development, and a predictor of outcomes in later years. It is assessed using the Early Development Instrument (EDI), an internationally recognized tool completed by a child's teacher upon school entry that identifies vulnerabilities in readiness to learn in five domains: physical health and wellbeing, communication skills and general knowledge, emotional maturity, social competence, and language and cognitive development (Offord, 2007).

In Grey Bruce, 30.5% of children (Boys: 35.2%, Girls: 25.6%) entering school have vulnerabilities in one or more domains of school readiness, as compared to 27.6% in Ontario (Boys: 34.3%, Girls: 20.7%)

Skills Gap Study (2014)

As the economy of Ontario continues to change along with national and global impacts so too does the Four County Region. It is important to know, with some degree of certainty, what assets and liabilities are present as we fashion a workforce and economic development strategy that keeps the region progressing to the future. This Skills Gap Study was commissioned by the Four County Labour Market Planning Board and its community partners as an update to the 2005 reports completed for Bruce Grey and Huron Perth.

The high school survey was administered to Grade 12 students in the Four County Region. The main topics covered by the questionnaire focused on the current academic achievements of students, their involvement in extracurricular activities, their involvement in volunteer activities, their involvement in part-time and summer work activities, their involvement in school co-op programs, their level of skills, their plans for future education and training, and their plans for a future career.

A total of 1390 valid surveys were returned for the high school survey for an overall response rate of 75%. The survey had 698 (51.1%) responses from female students and 668 (48.9%) responses from male students. In all but Bruce County there was a higher proportion of female students than male.

 - % of tenant households in subsidized housing: 16.3%

Source: Statistics Canada T1 Family File (2011)

“This activity is conducted for the development and dissemination of annual small area socio-economic data for Canadians and their families. These data, collected primarily from income tax returns submitted to the Canada Revenue Agency (CRA), provide income and demographic information for sub-provincial geographic areas. Data are used by municipal, provincial and federal government departments to evaluate programs and support policy recommendations. Data are used in business and educational fields to learn more about the markets targeted. Academics and researchers use the data for analyses of socio-economic conditions.”

“These data cover all persons who completed a T1 tax return for the year of reference or who received CCTB (Canada Child Tax Benefits), their non-filing spouses (including wage and salary information from the T4 file), their non-filing children identified from three sources (the CCTB file, the births files, and an historical file) and filing children who reported the same address as their parent. Development of the small area family data is based on the census family concept. The census family concept groups individuals either in a census family (parent(s) and children living at the same address) or identifies them as persons not in census families.”

Source: Statistics Canada. Annual Income Estimates for Census Families and Individuals (T1 Family File). 2014.
<http://www23.statcan.gc.ca/imdb/p2SV.pl?Function=getSurvey&SDDS=4105>

“Low-Income Measures (LIMs) included in the T1FF family tables 17 and 18 (CANSIM 111-0015) are a relative measure of low income. LIMs are a fixed percentage (50%) of adjusted median family income where *adjusted* indicates a consideration of family needs. The family size adjustment used in calculating the LIMs reflects the precept that family needs increase with family size. A census family is considered to be low-income when their income is below the Low-Income Measure (LIM) for their family type and size.”

SUBSIDIZED HOUSING

- 2,131 - RGI housing units in Bruce Grey
- 133 - Affordable housing units in Bruce Grey
- 111 - Rent Supplement Subsidies

An average of 873 individuals and families in Grey and Bruce Counties (Grey 653; Bruce 220) were on waiting lists for RGI Housing during the period of 2009-2013 (County of Bruce, 2014; Grey County, 2014).

YMCA OF OWEN SOUND GREY BRUCE HOUSING SUPPORT PROGRAM

The YMCA of Owen Sound Grey Bruce Housing Support Program assists youth (aged 16 to 24) and adults (aged 25 and over) with housing related issues including homelessness. The program is available throughout Grey and Bruce Counties and is designed to assist people to find or maintain safe and affordable housing to prevent homelessness. Services include: assistance with finding/accessing emergency shelter; one-to-one assistance to find and secure appropriate housing; landlord mediation and support; assistance with completing applications for housing and financial assistance, and referrals to other services and supports. In 2013, there were 3517 people, including 483 youth, who accessed the program (County of Bruce, 1276; County of Grey, 2241).

Running Out of Food

Question “The food that [you/you and other household members] bought just didn’t last, and there wasn’t any money to get more. Was that often true, sometimes true, or never true in the past 12 months?”

Estimate In Grey Bruce, 6.5% (5.2%–8.0%) of households sometimes or often ran out of food before they could afford to buy more.

Skills Gap Study (2014)

The employee survey was conducted via telephone with the general population of the Four County Region. Eligibility for the survey was restricted to individuals who met the follow criteria: resident of either Bruce, Grey, Huron or Perth County, over 16 years of age, and not retired. The aim of the survey was to determine the particular levels of work experience, education and skills possessed by the residents of the area, as well as information on mobility, household activities and job satisfaction.

The employee survey generated 1207 completed surveys, which provides a confidence level of 95% with a ±6% confidence interval. The survey aimed to have a 50:50 male to female ratio. The Four County Region had 594 male respondents (49.2%) and 613 female respondents (50.8%).

2014 Residential Waste Diversion Rates

The [2014 Ontario Residential Waste Diversion Rates report](#) includes links to spreadsheets with the 2014 residential waste diversion rates by municipal program and municipal group in Ontario. These rates are based on data submitted to WDO last year in the annual Municipal Datacall by 237 municipalities, recycling associations and First Nations (“municipal programs”).

The residential waste diversion rate is the percentage of Blue Box and other residential materials reported to WDO that are kept out of landfills or Energy-from-Waste facilities.

Please refer to WDO CEO Michael Scott’s blog [here](#), which explains the many variables that can affect the final residential waste diversion rates.

Highway 21 — The scenic 170 km two-lane road along the Lake Huron shoreline from the Ipperwash Beach area stretches north through to Southampton, where it veers inland heading east to Owen Sound. This part of Ontario offers spectacular sunsets year round but it can be a challenging route when the winter snows blow off the lake. Be prepared to spend the night in one of the many delightful communities along the way if the OPP close the road when the weather gets bad.

Ultra-High Speed Internet Coming to 300 Communities in Southwestern Ontario

"The governments of Ontario and Canada are investing up to \$180 million to help bring ultra-high speed internet to homes and businesses in southwestern Ontario. Canada and Ontario will each provide up to \$90 million towards the total project cost of approximately \$281 million. This investment is part of the new Southwestern Integrated Fibre Technology (SWIFT) project, which will expand access to broadband by delivering fibre optic coverage to over 300 communities with a total population of 3.5 million -- spanning counties and municipalities in southwestern Ontario, as well as Caledon and Niagara. The project will help southwestern Ontario communities and businesses better compete in global markets, attract new jobs and improve quality of life. It will also allow individuals to use online resources to gain skills and experience.

Expanding high-speed internet access is part of the government's economic plan to build Ontario up and deliver on its number-one priority to grow the economy and create jobs. The four-part plan includes helping more people get and create the jobs of the future by expanding access to high-quality college and university education. The plan is making the largest infrastructure investment in hospitals, schools, roads, bridges and transit in Ontario's history and is investing in a low-carbon economy driven by innovative, high-growth, export-oriented businesses. The plan is also helping working Ontarians achieve a more secure retirement."
